## Section 1: Hands-On Demonstration

### Part 1: Identify Forensic Evidence in an iOS Data Case

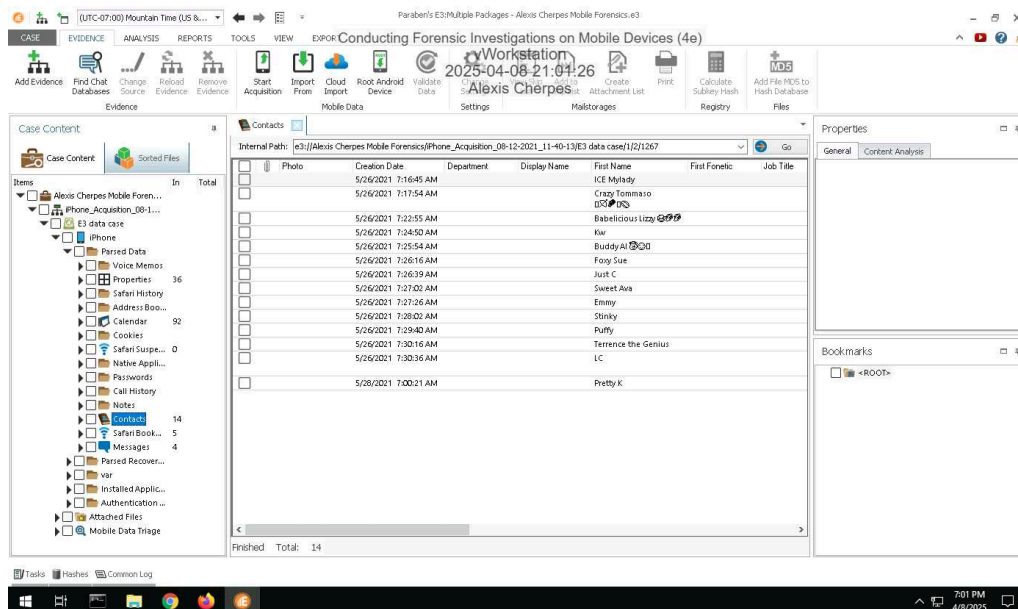

8. Make a screen capture showing the contents of the Properties pane.

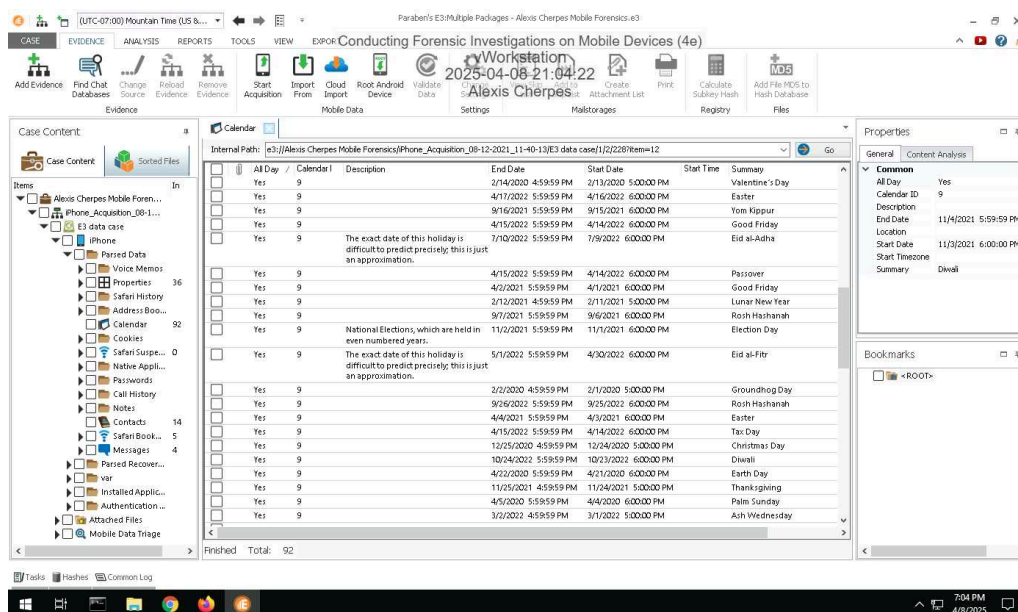

# Conducting Forensic Investigations on Mobile Devices (4e)

## Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

### 11. Make a screen capture showing the contents of the Contacts grid.

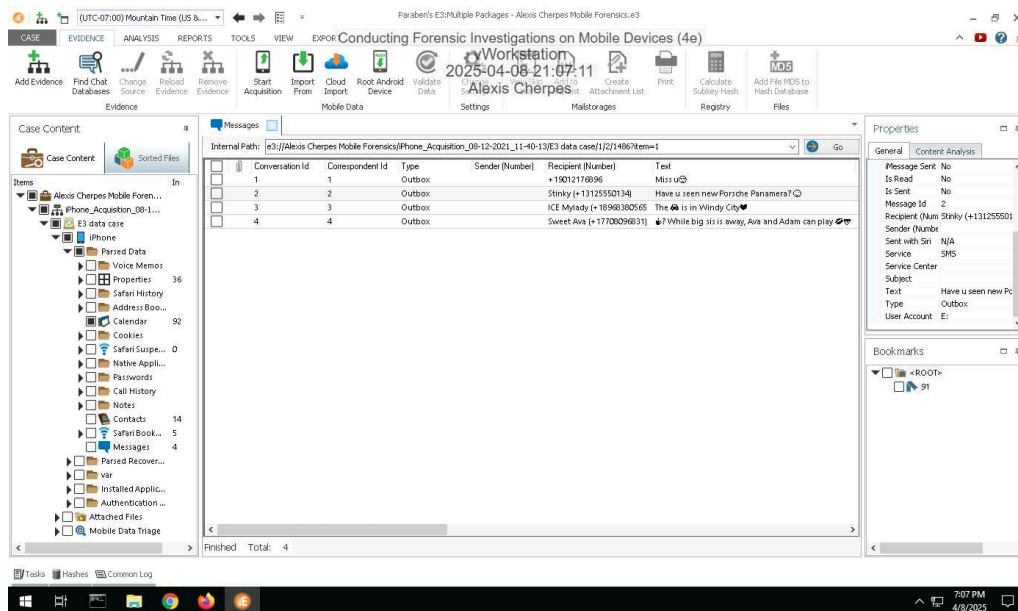

### 14. Make a screen capture showing the contents of the Calendar grid.

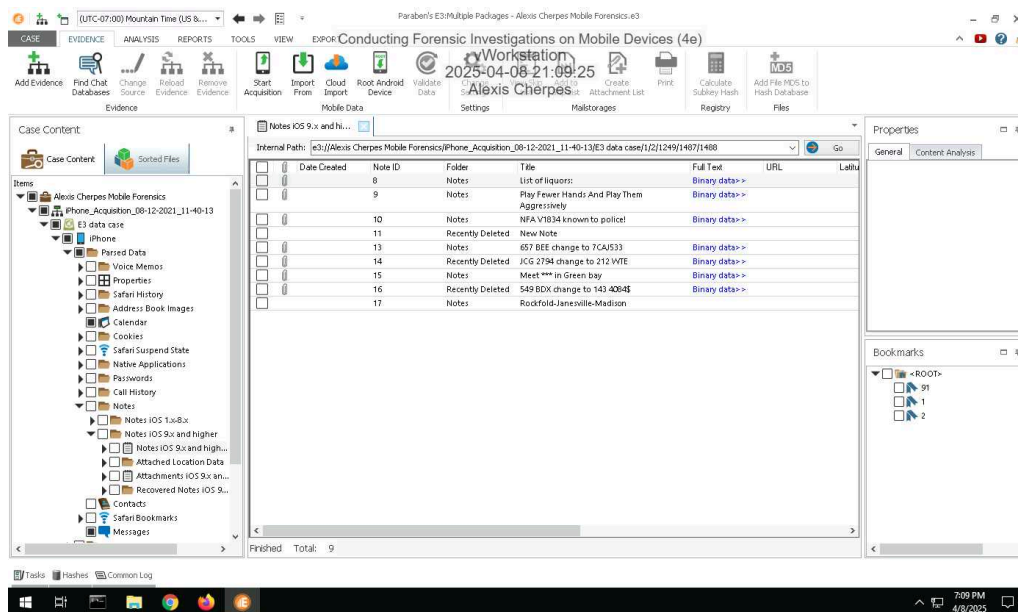

# Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

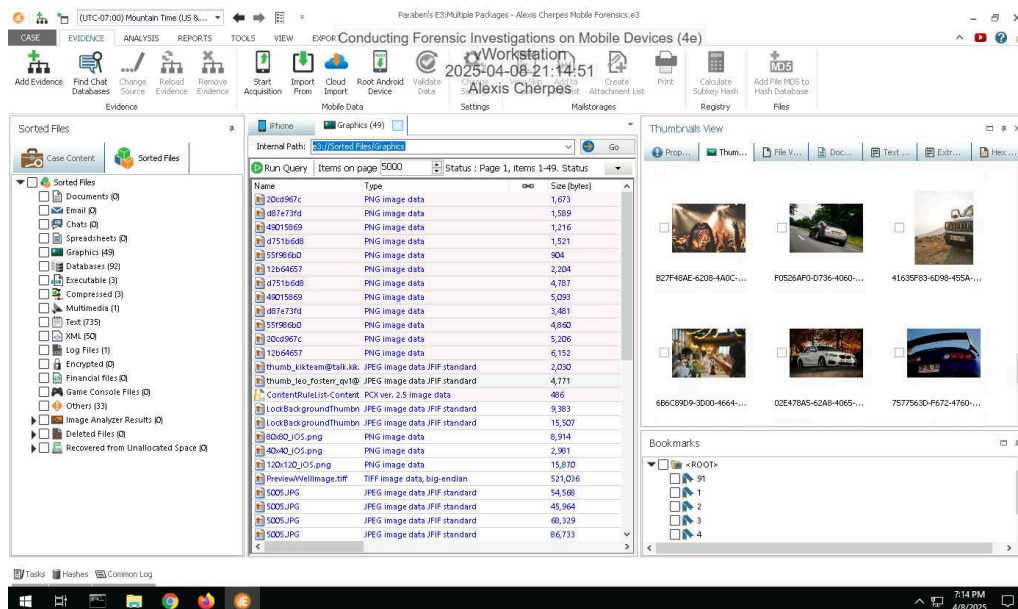

## 20. Make a screen capture showing the contents of the Messages grid.

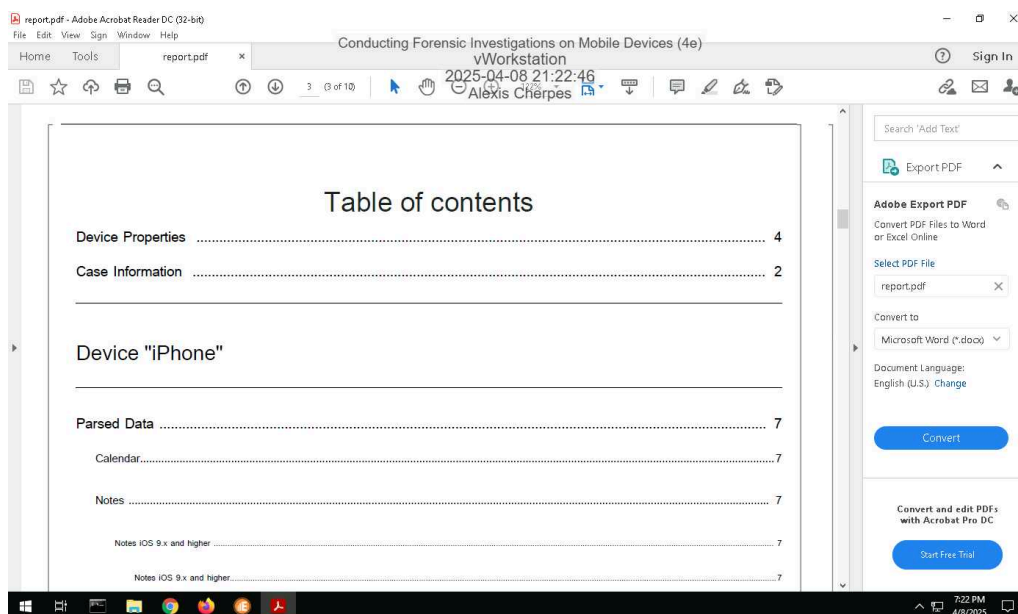

## 24. Make a screen capture showing the contents of the Notes grid.

### 34. Make a screen capture showing at least two car pictures in the Thumbnail View.

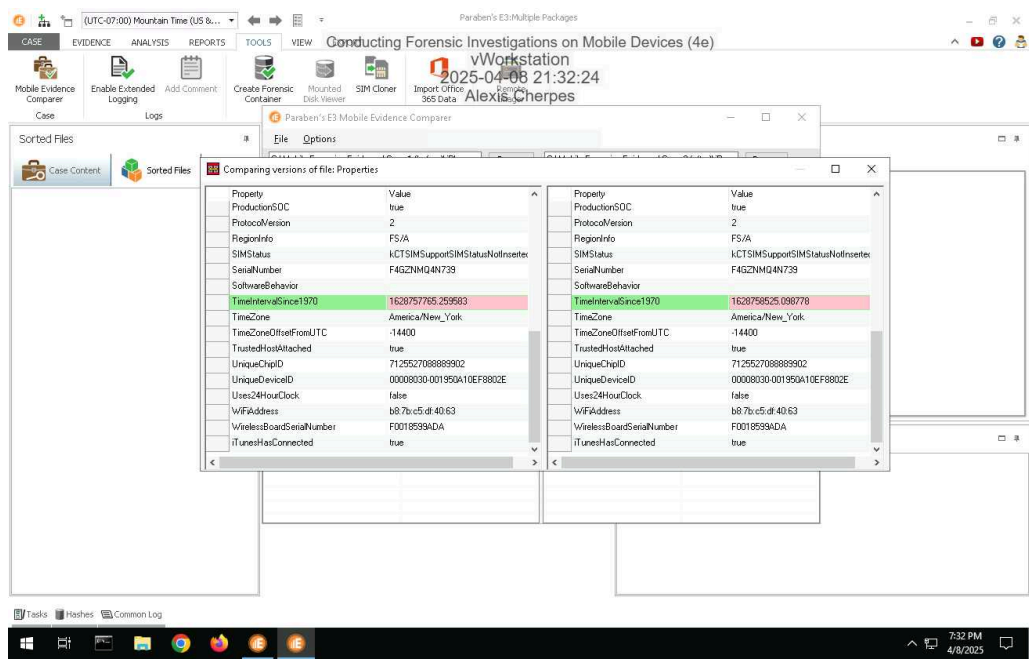

### 44. Make a screen capture showing the Table of contents in the investigative report.

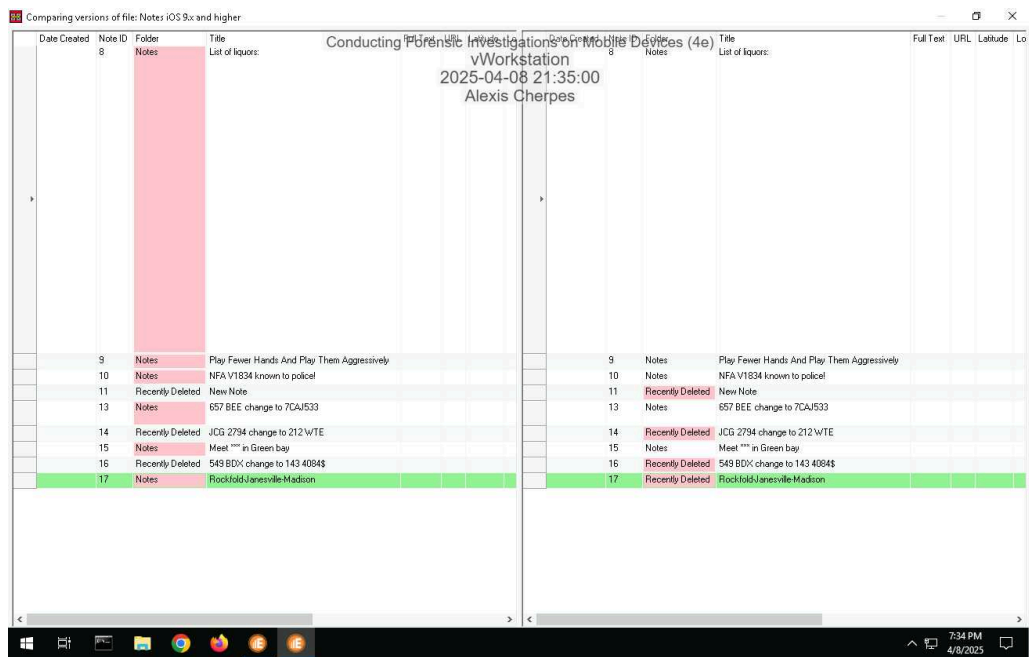

## Part 2: Compare iOS Data Cases

10. Make a screen capture showing the difference in data case properties.

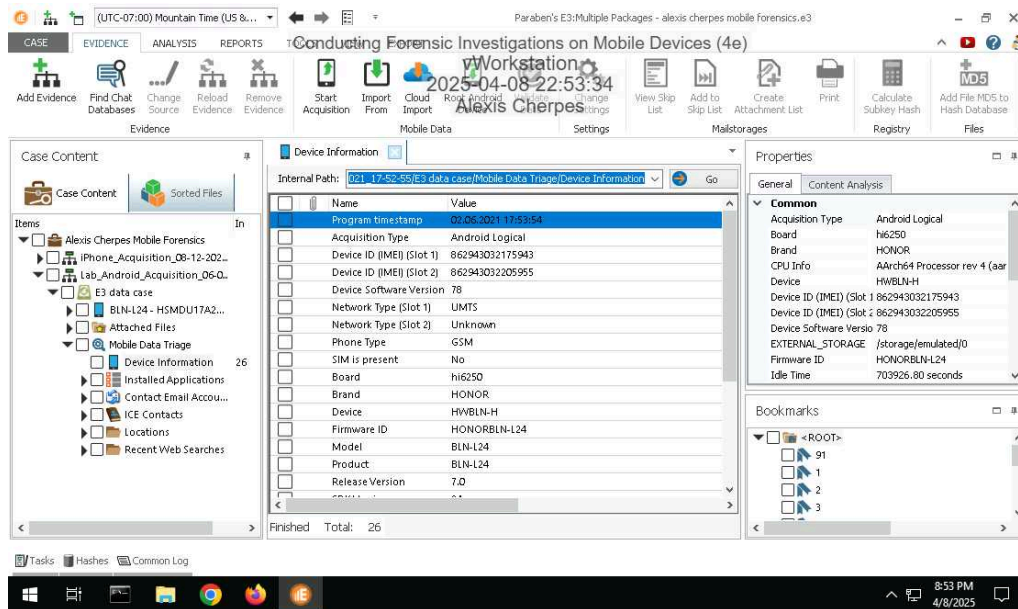

15. Make a screen capture showing the additional note in the newer data case.

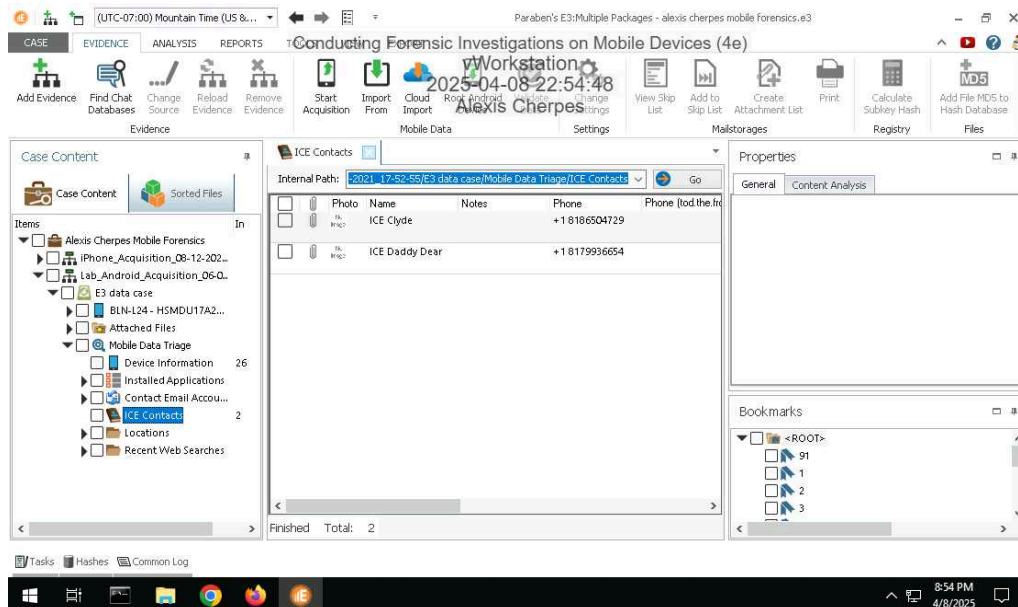

### Section 2: Applied Learning

#### Part 1: Identify Forensic Evidence in Android User Data

##### 7. Make a screen capture showing the Device Information.

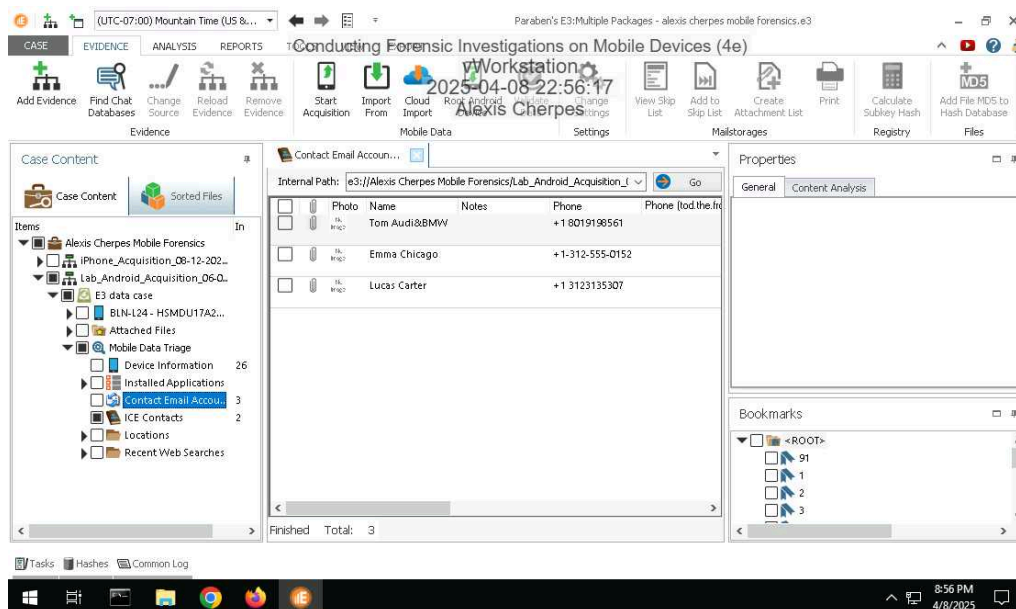

##### 9. Make a screen capture showing the ICE Contacts.

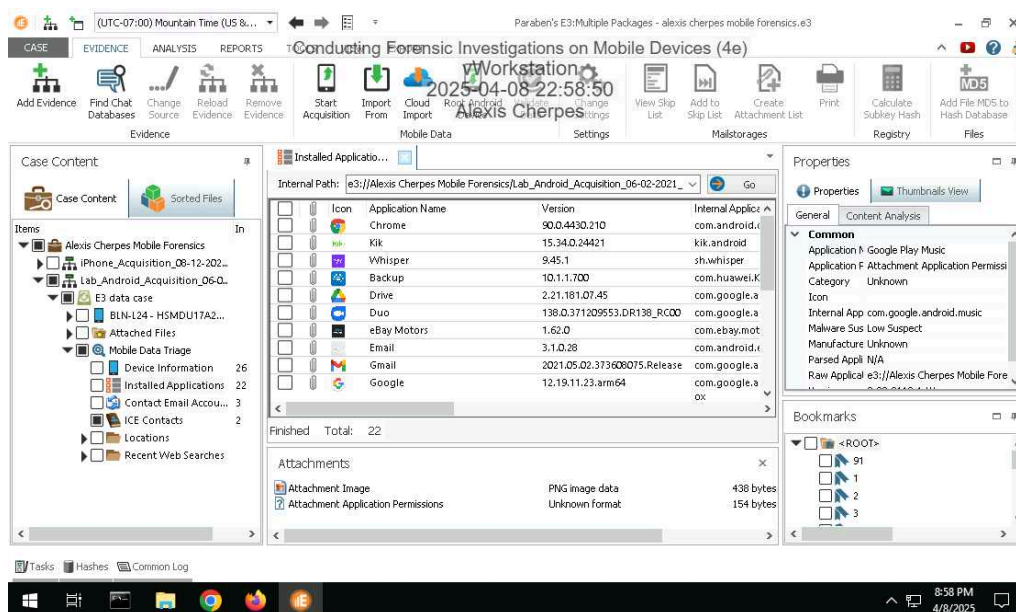

### 12. Make a screen capture showing the Contact Email Accounts.

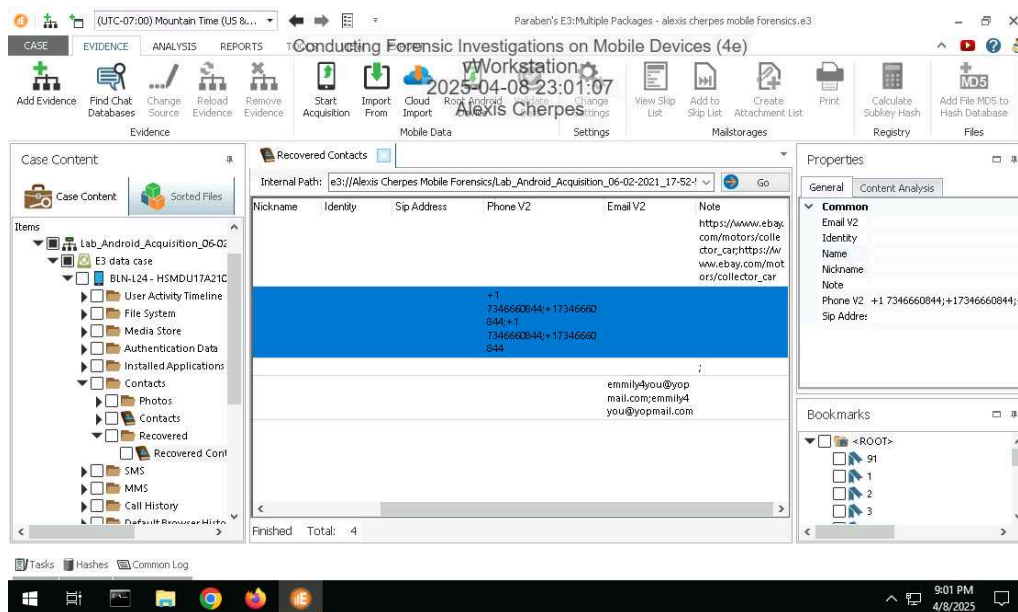

### 15. Make a screen capture showing the Installed Applications.

# Conducting Forensic Investigations on Mobile Devices (4e)

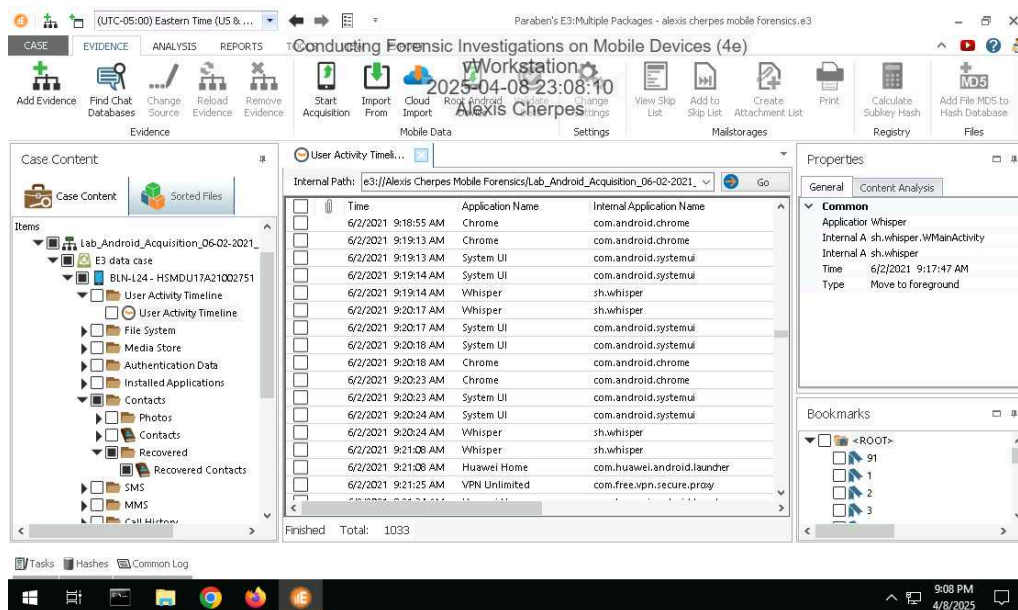

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

19. Make a screen capture showing the recovered contact information from the Android phone.

## Part 2: Identify Forensic Evidence in Android Application Data

4. Make a screen capture showing the User Activity Timeline between 9:17:47 AM and 9:24:51 AM on 6/2/2021.

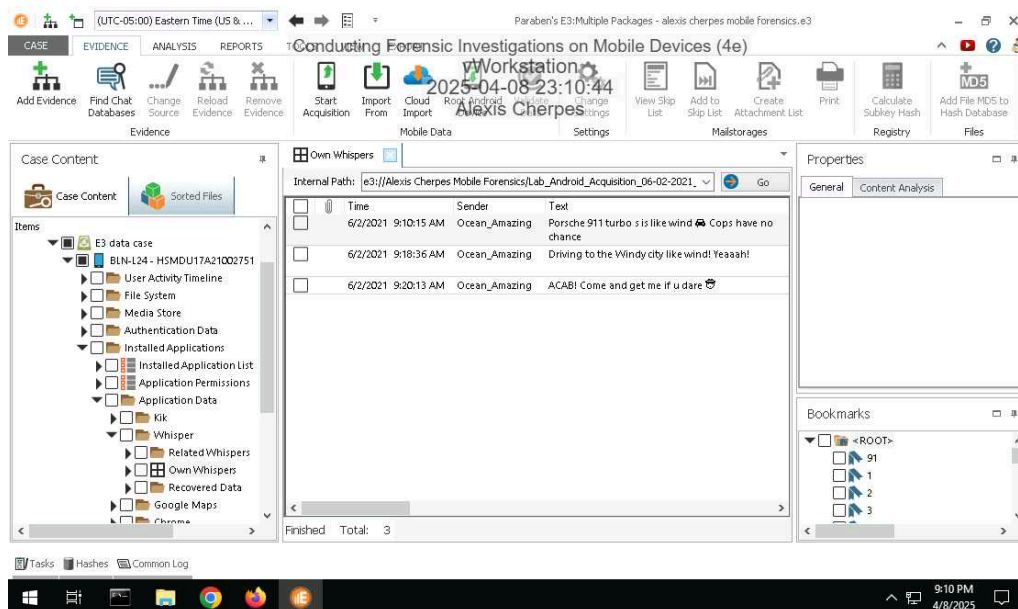

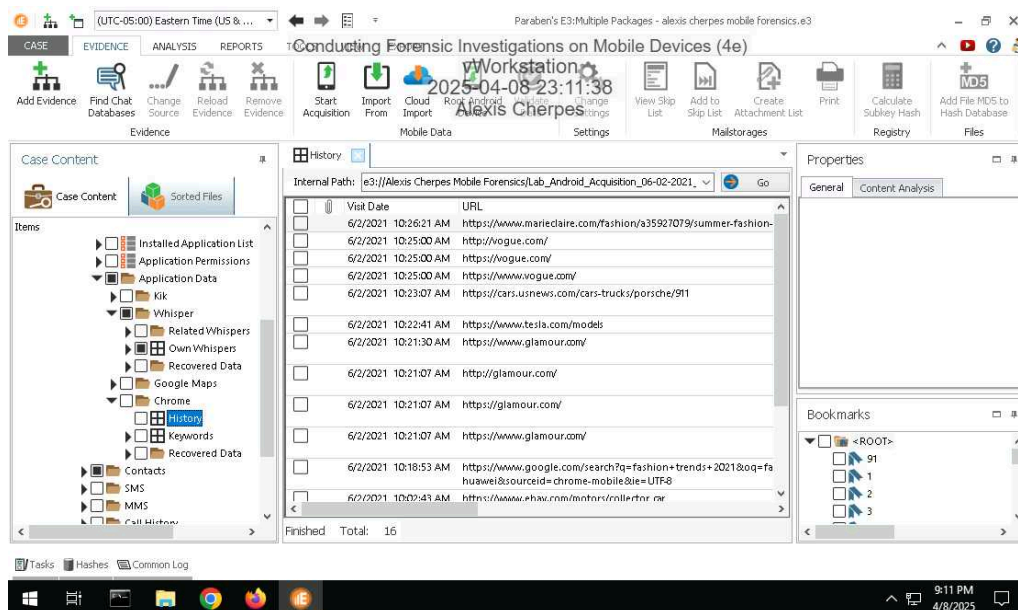

# Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

## 7. Make a screen capture showing the contents of the Own Whispers grid.

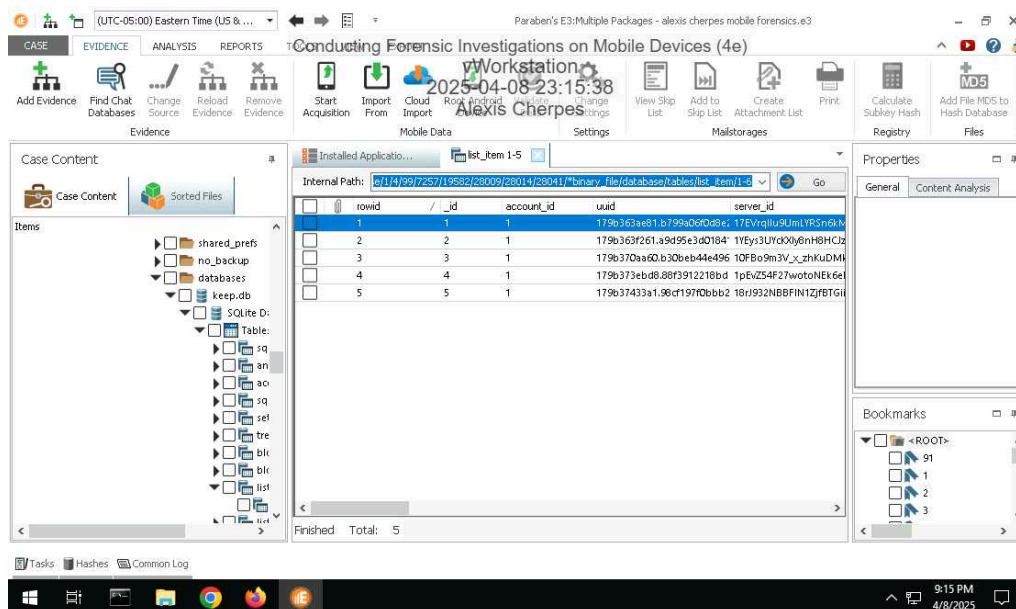

## 10. Make a screen capture showing the contents of the History grid.

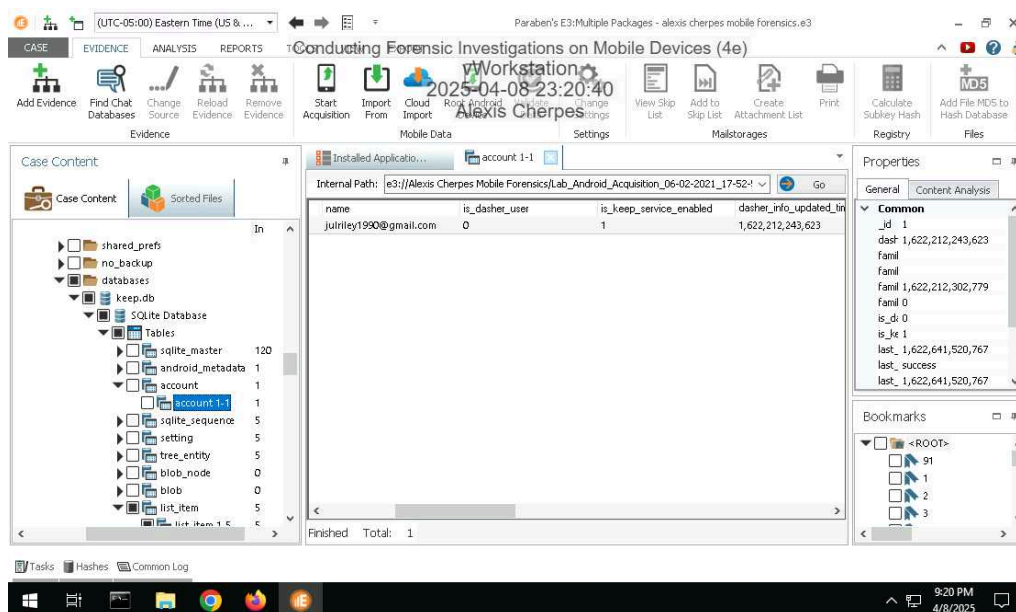

# Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

## 17. Make a screen capture showing the contents of the list\_item 1-5 table.

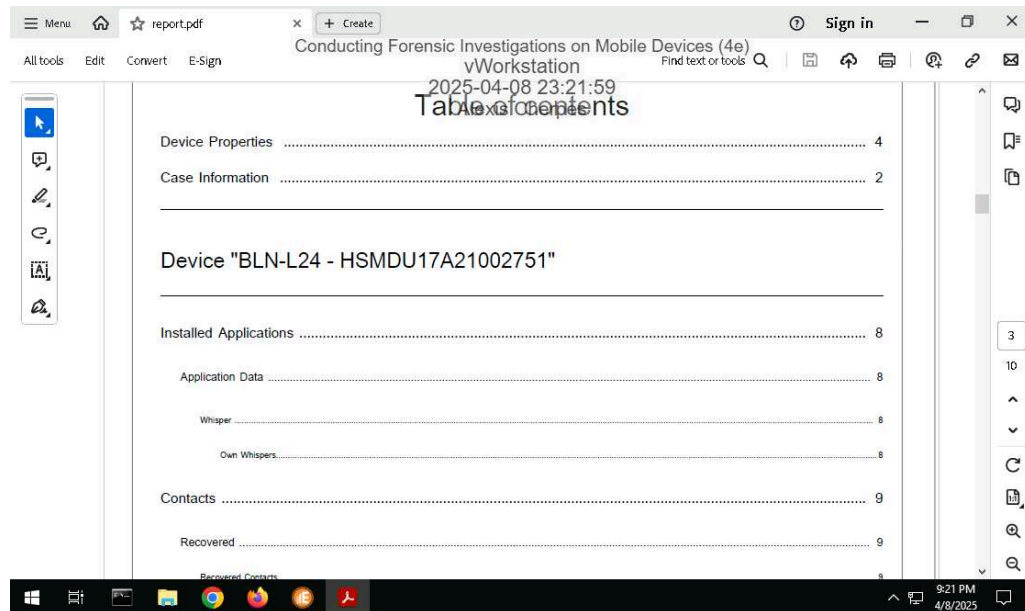

## 20. Make a screen capture showing the Keep Notes account owner.

# Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

23. Make a screen capture showing the Investigative Report's Table of Contents.

## Section 3: Challenge and Analysis

### Part 1: Research Report Writing for Digital Forensics

Prepare a brief summary of the appropriate structure and best practices for preparing a digital forensics report.

Best Practices: Maintain a detailed chain of custody. Use Licensed and reputable forensic tools for analysis. Verify the integrity of forensic images using hash. Document all steps taken.

### Part 2: Draft a Forensic Report

#### Case Summary

The Madison Police Department is investigating an organized car theft operation involving two suspects known by the aliases Bonnie and Clyde. As part of the investigation, authorities have seized two smartphones—one iOS and one Android—belonging to the suspects. The digital forensics team has been assigned to examine the data extracted from these devices to uncover evidence connected to the car thefts.

#### Findings and Analysis

iPhone-Device Identification: The iPhone is identified as an iPhone Series 12, running on product version 14.4, with the serial number F4GZNMQ4N739 Ownership: The iPhone is linked to an individual named Clyde based on contact information and ownership details of Android phone. Stolen Cars Evidence: Analysis of the iPhone's file sorting revealed evidence of 11 car pictures and the corresponding license plate number. Suspicious Activities: Car images with their license plate number gives strong indication of involvement of suspect into car theft cases.

Android- Device Identification: The Android device can be identified with the serial number of HSMDU17A21002751 and it is equipped with dual SIM capabilities. Ownership: The Android is associated to a Bonnie. Suspicious Activities: The Android device had installed applications such as Whisper which is an anonymous chatting app, and eBay Motor, which is commonly used for selling goods including stolen cars.

#### Conclusion

The forensic analysis of the seized Android and iPhone devices has revealed significant evidence implicating suspects with the code names of Bonnie and Clyde in an organization connected to car theft. The iPhone that was linked to Clyde had pictures of stolen cars with corresponding license plate numbers. The Android that was linked to Bonnie contained notes listing stolen cars and suspicious applications.
